

Transporting Safe with an early Start

A Seminar Addressing
Safe Transportation Needs
of the NICU Patient

sponsored by

August 25-26, 2010
Fort Worth Omni Hotel

Pre-conference to the KIDZ IN MOTION
National Child Passenger Safety Conference

Description:

The trend of discharging newborns at lower weights leaves healthcare providers with multiple challenges for ensuring safe and secure transport. This seminar, the fourth annual, will address these challenges. Child Passenger Safety (CPS) newcomers will have the opportunity to complete a newly-developed staff training for safe transport of preterm and low birth weight infants, while more advanced practitioners can participate in the group development of ideal newborn car seat testing and discharge policies that they can take home and

Who Should Attend?

- Hospital staff: nurses, physicians, occupational and physical therapists, ancillary personnel, CPS Technicians and advocates

Topics:

- American Academy of Pediatrics clinical guideline updates: Safe Transport of Preterm and Low Birth Weight Infants at Hospital Discharge
- Presentation of new curriculum: Transporting Premature and Low Birth Weight Infants, developed by Riley Hospital for Children, Indianapolis
- Performing the car seat angle tolerance test
- Research results on follow-up angle tolerance testing
- Risk managers tell all: The risk management perspective on hospital policies for discharge and newborn safe transport
- Specialized "meet the manufacturer" and hands-on opportunity highlighting current child restraints that safely meet the needs of the premature infant
- Other newborn special health care needs that can impact safe transport

Advanced Topics:

- Group exercise: Developing the best newborn testing and discharge policies for safe transport
- Liability waivers and dilemmas with the 5-pound car seat
